

Future Planning

Wakatipu Basin

September 2016

MOE update

1. Individual school growth planning
2. Growth strategy planning
3. Timeframe for further engagement
4. Sector inputs

Proposed timeframe

Further round of community engagement

- Mid-late November
- **Sector input sought**
 - Methodology – what worked well/could be improved for next phase? Other ideas?
 - Report back timeframe

Formation of Ministry recommendation and report to Minister

- March 2017
- Possible decisions May 2017

Individual timeframes for build rolls will continue

Key messages

MOE – retains responsibility for network management (stewardship role)

- Sector input – expertise as education sector leaders
- Community input – help MOE to understand local context and preferences
- Ministry develops options and recommendations using inputs as part of wide information gathering
- **Minister of Education will approve strategic direction**

Individual School plans

All state schools:

- Network analysis identifies rolls for short medium and long term needs
- Implementation of short/medium term based on identified timeframes – guidance to EIS for service delivery
- **Growth strategy will provide coherence between individual schools at a structural level and identify what changes may be required as a longer term response (10-20 Years)**

State-integrated schools – maximum roll increase process to meet demand as required

Individual School planning

School	Short/medium term planning roll	Master planning roll
Arrowtown School	700	850
Queenstown School	TBC	950
Remarkables Primary School	630	590
Shotover Primary School	650 (stage 2)	900
Wakatipu High School	1200	1800

Note – master planning rolls represent possible levels of demand, are for planning purposes, and Schools may not grow to this size.

Engagement - November

Purpose – to identify community views about next primary provision and outline longer term structural options and seek feedback

Two key timeframes:

- Short term – new primary provision governance structure
 - Options for this will be scoped and resources produced to help inform discussion
- Longer term – structural options outlined for development of growth strategy
 - Will be 10-20 year plan
 - Key objective would be to identify longer term direction to begin establishing site acquisition requirements
 - Will provide a longer term signal to Government about growth requirements

Tensions in developing growth strategy

- Establishing timeframes vs flexibility to respond to changes
 - Proactive vs reactive responses
 - Community preferences vs Government restraints
 - Future proofing vs future possibilities
-
- **Growth strategy will enable direction**
 - **Specifics of implementation will require formal consultation at identified points**

Feedback sought

- ✓ Draft engagement report
- ✓ Summary for wider communication
- ✓ Engagement report back timeframe
- ✓ November engagement methodology
- ✓ November engagement content requirements

Lifting aspiration and educational
achievement **for every New Zealander**
